## **CONFIGURATION OF A LINKSYS/CISCO PHONE FOR USE WITH UBILITY'S VOIP SERVICE**

### **CONNEXION OF THE PHONE TO OUR PROVISIONNING SERVER**

Here are the steps to follow :

- 1) Start the phone and identify its IP address : - Using the menu button on your phone, go to " Network Options " and press the "Select" button. For this example, we will suppose that the IP address of the phone is 192.168.1.113
- 2) Point your navigator to the web interface of the phone: <http://192.168.1.113>
- 3) Click on "Admin Login" link, and then click on tab "advanced" link at the top of the advanced administration page of the phone.
- 4) Click on "Provisioning" tab, then fill the space "Profile Rule:" [http://p.ubility.com/ng/cisco/\\$MA](http://p.ubility.com/ng/cisco/$MA)
- 5) Click on the button at the bottom of the page "Submit All Changes". Your phone will reboot. After the reboot, the phone will retrieve its configuration files and register with the Ubility service.
- 6) If the phone takes a while to do that, you can force the phone to reaprovision immediately by copy pasting this link for example in a navigator:  
[http://192.168.1.113/admin/resync?http://p.ubility.com/ng/cisco/\\$MA](http://192.168.1.113/admin/resync?http://p.ubility.com/ng/cisco/$MA)
