

Ubity UC Mobile

for Android | **PRODUCT SHEET**

OVERVIEW

Take your favorite UC software in the palm of your hand with Ubity UC Mobile. Available on Android devices, Ubity UC is a dynamic unified communications application that makes it easy to stay connected anytime, anywhere. Use your device's existing contact list to make and receive high-quality voice over IP (VoIP) business calls over a Wi-Fi or mobile data network connection. Ubity UC is a trusted and secure application that acts as an extension to your phone system. It's the perfect solution for small and medium-sized enterprises battling the growing demands of a Bring-Your-Own-Device (BYOD) and mobile workforce.

KEY FEATURES

- ✓ Premium features include HD video calling (H.264), messaging and presence
- ✓ Highly secure with signaling and media encryption built-in (SIP-TLS and SRTP)
- ✓ Utilizes the G.722 codec for optimized, high-definition audio
- ✓ Advanced and intuitive user interface with multitasking support

KEY BENEFITS

- ✓ Take powerful office communication tools on the go
- ✓ Extended standard phone features such as call recording, transferring, merging and splitting calls, and many more
- ✓ Consistent look and feel with other Ubity UC applications for a unified experience from desktop to mobile
- ✓ Save money by using Wi-Fi or mobile data instead of paying by the minute, and eliminate long distance charges
- ✓ Seamless connectivity – employees can get in touch with team members and clients using the same number they would at their desk

Let's start talking!

ADVANCED USER INTERFACE AND PHONE FEATURES

Ubity UC Mobile is based on the latest technologies to create an unsurpassed user experience. Because it is based on the Android native phone design, users can take comfort in its ease of use when navigating across the dial pad, contacts, call history features and other menus. Users can also benefit from improved task flow when handling voice and video calls with one-touch access to an array of call management options. Its intuitive user interface is designed with consistency in mind, reducing the learning curve in adopting mobile unified communications technologies and providing a seamless, unified experience across all Ubity UC platforms.

EXTEND YOUR ENTERPRISE COMMUNICATIONS

Ubity UC Mobile becomes an extension to your phone system, and offers an easy way to integrate your company's Ubity voice and messaging solutions with your employees' mobile devices. Business users benefit from better productivity, communication and customer service by taking their office phone on the go, while enterprises enjoy significant cost savings by avoiding mobile carrier and long distance charges.

HIGH QUALITY VIDEO CALLING

Experience calls on a more personal level and enjoy face-to-face interaction using Ubity UC on your Android device. Utilize the front or rear-facing camera on your phone and see how you look to the caller with picture-in-picture view. Recent video compression improvements to H.264 (MPEG-4) offer higher quality streaming for a clearer and sharper display.

MESSAGING AND PRESENCE

Exchange messages with your contacts or engage in a group chat with up to ten participants from your Android phone with Ubity UC Instant Messaging. See when contacts are available and share your presence status to reduce communication delays and avoid playing phone tag.
