

SECURE SIP TRUNKING

Ubity's Secure SIP trunking service (SIP-TLS and SRTP): an unparalleled service connecting your IP-PBX to our public cloud platform

Secure a number from anywhere in North America or from one of the 67 countries covered by Ubity and benefit from a wide range of additional advantages at a low cost — all under one roof!

✓ Protect your communications

Ensure total confidentiality from our platform to your IP-PBX with our highly secure SIP-TLS service

✓ Boost your savings

Experience cost savings with our competitive pricing for your local, long-distance and international calls without compromising service quality

✓ Adapt our services to your needs

Adapt our services to your needs by actively increasing your number of phone lines with our "Lines on Demand" service

✓ Prevent fraud

Benefit from our anti-fraud protection while Ubity prevents privacy breaches and tampering of your SIP trunking at all times

✓ Record your conversations

Record and retrieve your conversations with our included call recording service

✓ Forward your calls

Redirect your calls instantly to an alternative destination in case of a service outage

Manage your communications via **Studio**

Take control of your communications via our online management portal, Studio, within which you can redirect your calls in one click, analyze your call statistics, retrieve your call recordings, organize audio conferences, send faxes, and much more.
